DETAILED ACTION

Election/Restrictions

This is in reference to response received 21 March 2006 to the office action mailed 21 November 2005. Examiner acknowledges applicant cancel all claims 1 – 31 and adding new claims 32 – 43. There are 12 claims, claims 32 – 43 pending for examination.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 32 – 43, drawn to method, system and program to introduce a provider who can provide a service conforming with a request of an applicant with history registration step, classified in class 705, subclass 1.
- II. Claims 32 and 34 – 41, drawn to method and system to introduce a provider who can provide a service conforming with a request of an applicant which does not require a history registration step, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

This application contains claims directed to the following patentably distinct species: Group I requires a registration step for registering contents of processing in provider step, which is used for selecting a service provider, whereas, group II does not

require a registration step for registering contents of processing in provider step, and, make require different methodology for the selection of a service provider.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 3629

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naresh Vig whose telephone number is (571) 272-6810. The examiner can normally be reached on M-F 7:30 - 6:00 (Wednesday off).
